

Dashboard Design

Date	06 September 2026
Team ID	
Project Name	India's Agriculture Crop Production Analysis
Maximum Marks	5 Marks

Creating an effective dashboard involves thoughtful design to ensure that the presented information is clear, relevant, and easily understandable for the intended audience. Here are some key principles and best practices for dashboard design

Activity 1: Interactive and visually appealing dashboards

Creating interactive and visually appealing dashboards involves a combination of thoughtful design, effective use of visual elements, and the incorporation of interactive features. Here are some tips to help you design dashboards that are both visually appealing and engaging for users so take care of below points

- Clear and Intuitive Layout
- Use Appropriate Visualizations
- Colour and Theming
- Interactive Filters and Slicers
- Drill-Down Capabilities
- Responsive Design
- Custom Visuals and Icons
- Use of Infographics

Note: Highlight the major outcomes in form of bullet points

Sample:

Here are five potential outcomes from the dashboard image provided:

- **Highest yielding year:** 2016-17 is the year in which highest agriculture yield of about 679M is obtained.
- **Highest Production:** Kerala is the state with highest crop production and Ladakh is the state with lowest crop production.
- **Peak season:** Kharif Season has the highest production while autumn has the lowest crop production.
- **Top yielding Crop:** Sugarcane and Sesamum are the most yielding crops in whole India.
- **Cultivable area for crops:** Rice and wheat are the highest cultivated crops in whole of India.

Activity 2

Publish Dashboard on Tableau Public and Paste the Dashboard Public link below:
