

Data Collection and Preprocessing Phase

Date	06 September 2026
Team ID	
Project Title	India's Agricultural Crop Production Analysis
Maximum Marks	2 Marks

Data Collection Plan & Raw Data Sources Identification Template

Elevate your data strategy with the Data Collection plan and the Raw Data Sources report, ensuring meticulous data curation and integrity for informed decision-making in every analysis and decision-making endeavor.

Data Collection Plan Template

Section	Description
Project Overview	Project is dealing with Indian crop production analysis over the years and in different states. In this, we made various visuals of crop production with respect to different seasons, different states, and many other filters. We also created the dashboard comprising all the visuals and key filters. Then we created a story describing the project in a sequential and better way.
Data Collection Plan	Dataset is collected from the Kaggle
Raw Data Sources Identified	This dataset is supported by: 1. Kaggle – A highly utilized, precleaned public environment containing district-wise area and production data from 1997-2021

	derived straight from official ministry archives 2. UPAG Portal – The official Unified Portal for Agricultural Statistics, allowing interactive dashboard generation and CSV exports of crop-wise Area, Production, and Yield (APY) datasets.
