

Story

Date	06 September 2026
Team ID	
Project Name	India's Agriculture Crop Production Analysis
Maximum Marks	5 Marks

By using stories in Tableau, you can effectively communicate complex data in a way that is both interactive and engaging, making it easier for the audience to follow along and understand the insights. It's a tool for **data storytelling**, allowing you to present insights in a cohesive, engaging way that takes viewers through a logical progression of findings or analyses.

In Tableau, **Story** is a feature that allows you to create a sequence of dashboards, visualizations, and text to present data insights in a cohesive and narrative-driven way. It's like a slideshow within Tableau that guides the audience through a series of data points, helping them understand key insights, trends, or outcomes of your analysis.

Observations:

- **Highest yielding crop: Sugarcane is the highest yielding crop.**
- **Seasonal Production Trend:** Production peak in Kharif, while Autumn sees the lowest production, indicating a possible seasonal trend.
- **Top cultivated crops:** Rice and wheat are the most grown crops.
- **Highest Producing state:** Kerala produces highest crops while Ladakh has the lowest production.

Activity 2:

Publish Story on Tableau Public and Paste Public link below
